

ANTERIOR VIEW OF HUMAN SKELETON

(King and Showers)

SUPERFICIAL MUSCLES OF RIGHT UPPER EXTREMITY
(Jones and Shepard)

SUPERFICIAL MUSCLES OF RIGHT LOWER EXTREMITY
(Jones and Shepard)

MUSCLES OF TRUNK, POSTERIOR VIEW

The latissimus dorsi and trapezius on the right side have been cut away to expose the underlying muscles. (Jones and Shepard.)

MUSCLES OF TRUNK, ANTERIOR VIEW

The left sternocleidomastoid, pectoralis major, external oblique, and a portion of the deltoid have been removed to show underlying muscles. A portion of the rectus abdominis has been cut away to expose the posterior part of its sheath. (Jones and Shepard.)
